ESTHER WANJIRU KUNG'U

+254 742 987 208 | wanjirukungu2022@gmail.com | LinkedIn | GitHub | Nairobi, Kenya

PROFESSIONAL SUMMARY

Full stack software engineer with 3+ years of experience building web products end to end: Next.js and TypeScript frontends, Go and Python services, PostgreSQL data models, and the Docker, Kubernetes and CI/CD that ship them. Works on a distributed team, with caching and CDN work that cut page loads by 40% and API response times by 35%. Strong habits around testing, code review, and documentation.

EXPERIENCE

Software Engineer | Obmondo (Denmark, remote) *Aug 2024 – Aug 2026*

Features Team: designing and implementing new capabilities for LinuxAid (Linux ops toolkit) and KubeAid (Kubernetes automation and management).

- Designed the frontend and backend architecture for a usage-based invoicing service, and built its reusable component library in Next.js, TypeScript and Tailwind CSS on a Go and PostgreSQL backend.
- Built backend services and REST APIs in Go and Python across 5+ production applications, and contributed enhancements to the company website and a custom monitoring and alert management service.
- Cut page load times by 40% and API response times by 35% with Redis, Memcached, and Cloudflare CDN caching, and resolved 50+ production issues spanning frontend, API, and data layers.
- Designed PostgreSQL and MySQL data models and the RBAC authentication layer securing 10,000+ user sessions, with Keycloak SSO for centralized sign-in.
- Developed Errbot automation plugins in Python for team notifications, with unit and integration tests and coverage tracking; overall test coverage held at 85%+.
- Containerized services with Docker and shipped through GitHub Actions and ArgoCD for zero-downtime releases on 50+ production Kubernetes clusters.

Presales Solutions Architect (Intern) | Airtel Africa *May 2024 – Jul 2024*

- Analyzed enterprise customer and B2B Mobility Services data and built reports and dashboards in Power BI and Tableau for Airtel Kenya's Enterprise Business team.
- Worked with account managers to gather business customers' requirements and map them to Airtel's enterprise mobility and connectivity solutions.
- Helped prepare technical solution proposals and client presentations, turning data insights into recommendations for business customers.

Software Engineering Intern | OneKitty (Hybrid) *Jan 2023 – Dec 2023*

- Built and maintained Spring Boot microservices for a contribution and fundraising platform, improving service reliability by 25%.
- Worked on PHP services alongside the Java stack and added regression tests to catch issues before release.

EDUCATION

BSc Computer Science (Software Engineering), Second Class Upper Honours, St Paul's University | 2022 – 2024
Diploma in International Relations, Merit, Strathmore University | 2019 – 2021

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
Backend: Go, Python, Java, REST APIs, microservices, authentication and RBAC, Spring Boot
Data: PostgreSQL, MySQL, Redis, Memcached
DevOps: Docker, Kubernetes, Helm, ArgoCD, GitHub Actions, Gitea Actions, AWS, Cloudflare CDN
Quality: Unit, integration and end-to-end testing, pytest, code review, Prometheus monitoring

CERTIFICATIONS & LEADERSHIP

Founder: NiaTalent (niatalent.com), a platform that assesses African talent through real work simulations and places them with companies worldwide
Certifications: Google Project Management; Google Data Analytics; AWS Certified Solutions Architect, Associate (in progress)
Leadership: Chair, Youth Innovation & Future Technologies Council, MATA (Marketers Accelerating Trade in Africa), since Aug 2025
