PROFESSIONAL SUMMARY

DevOps and platform engineer with two years operating 200+ Linux servers and 50+ production Kubernetes clusters for customer and internal environments. Builds CI/CD and GitOps pipelines, automates configuration and patching, manages infrastructure as code, and handles incidents through to root cause. Writes the Go and Python services behind the platform, with strong habits around testing, code review, and documentation.

EXPERIENCE

Software Engineer | Obmondo (Denmark, remote) *Aug 2024 – Aug 2026*

Features Team: designing and implementing new capabilities for LinuxAid (Linux ops toolkit) and KubeAid (Kubernetes automation and management).

- Operated 200+ Linux servers and 50+ production Kubernetes clusters, handling alerts, incident management, and root cause analysis for customer and internal environments with Prometheus monitoring.
- Migrated workloads from Azure Kubernetes Service (AKS) to self-hosted Cluster API (CAPI) on Hetzner bare metal, cutting cloud costs and improving compute performance.
- Moved provisioning to Crossplane with custom Compositions for Kops and AKS environments, removing configuration drift and speeding up deployments; also worked with Terraform.
- Built CI/CD pipelines with GitHub Actions and Gitea Actions integrated with ArgoCD and Helm for zero-downtime GitOps releases; automated OS patching and configuration across the fleet with Puppet.
- Deployed Harbor with Kyverno policies as an internal image proxy to bypass Docker Hub rate limits and secure deployments, and rolled out Keycloak SSO for centralized identity and access.
- Developed backend services and a custom monitoring and alert management service in Go and Python with PostgreSQL, keeping 85%+ test coverage and writing runbooks with a team across Denmark, Argentina, India, and Kenya.

Presales Solutions Architect (Intern) | Airtel Africa *May 2024 – Jul 2024*

- Analyzed data and built reports and dashboards in Power BI and Tableau for Airtel Kenya's Enterprise Business (B2B) team, supporting solution proposals for business customers.

Software Engineering Intern | OneKitty (Hybrid) *Jan 2023 – Dec 2023*

- Built and maintained Spring Boot microservices for a contribution and fundraising platform, improving service reliability by 25%.
- Worked on PHP services alongside the Java stack and added regression tests to catch issues before release.

EDUCATION

BSc Computer Science (Software Engineering), Second Class Upper Honours, St Paul's University | 2022 – 2024
Diploma in International Relations, Merit, Strathmore University | 2019 – 2021

TECHNICAL SKILLS

Linux & Networking: Linux administration, Bash, OS patching; TCP/IP, HTTP, AWS VPC, Cloudflare CDN
Containers & Kubernetes: Docker, Kubernetes in production, Helm, Cluster API, Harbor, Kyverno
CI/CD & GitOps: GitHub Actions, Gitea Actions, Jenkins, ArgoCD, Git
Cloud & IaC: AWS (EC2, S3, VPC), Azure Kubernetes Service, Hetzner; Crossplane, Terraform, Puppet
Programming & Data: Go, Python, Java, TypeScript; REST APIs; PostgreSQL, MySQL, Redis
Monitoring & Security: Prometheus, alerting, incident response, RCA; RBAC, Keycloak SSO

CERTIFICATIONS & LEADERSHIP

Founder: NiaTalent (niatalent.com), a platform that assesses African talent through real work simulations and places them with companies worldwide
Certifications: Google Project Management; Google Data Analytics; AWS Certified Solutions Architect, Associate (in progress)
Leadership: Chair, Youth Innovation & Future Technologies Council, MATA (Marketers Accelerating Trade in Africa), since Aug 2025
